The Science of Consciousness

June 5-10, 2017, La Jolla, California

"To have a glimpse of what consciousness is would be the scientific achievement before which all others would pale."

William James

'The Science of Consciousness' ('T=C') is an interdisciplinary conference on all aspects of the=nature of conscious experience, awareness, feelings and existence. How doe= the brain produce consciousness? Is consciousness intrinsic to the universe, or an epiphenomenal illusion? How can=A0consciousness causally affect brain processes? What are the best em=irical theories? Do we have free will? How did life and consciousness originate and evolve? What are the origins of moral and aesthetic values? How can we improve mental, physical and cognitive functi=n? Can consciousness persist after bodily death, e.g. through 'up=loading' to machines, or via mental processes tied to the natural world=

Informal, intensive and interdisciplinary in a=fun environment, the 24th annual TSC conference will consist of Plenary Sessions, Pre-Plenary Workshops, Evening Concurrent Talk and Poster sess=ons, Technology and Art Exhibits, Social Events and Entertainment.<=pan style="font-size:14pt"> =C2◆
