Jeffrey

Once the shop removed the wood trim that held the Vinyl interior trim, it left some rough edges around the window trim area,.

If you look close around the window edges on photos 2 and subsequent, Edges are irregular.

The interior shop is trying to come up with a solution, to make it look clean and finished.

- 1-Simple Bondo and paint?
- 2-White Window sealant / caulking?
- 3-fabricate fiberglass interior trim?

Do you have any ideas you prefer?

Thx, Larry

Wood trim that was used to hold interior panels, that was removed,.
