Subject: crypto currency for Italians

my explanation for my Italian friends of crypto currencies. =A0 There is a masquerade ball. all the participants can =atch and count as a person in a distinct costume gets a kiss from someone= else. . Everyone is a witness to the kiss =hen asked . each person can say the person in that particular costum= ie =got a total of a know number of kisses, . there is a vid=o taken of the ball and everyone in it. =A0 A kiss is like a bitcoin . it doesn't really exist as=a "thing", but everyone in the room can verify how many y=u have gotten. . The video of the event is the" open ledg=r." everyone can download a copy of it for review in case of fa=se claims. no one knows who is actually under each costume .=C2 (crypto</=pan>). all the videos of each event strung together by precise dat= and time (the blockchain .). A kiss has value that ca= be exchanged for other things . :)
