I do apologize=for not letting you know but your in residence and I can't afford to r=n out of water on GSJ.

We need to revisit purchas=ng a new water maker for GSJ. It's just not working, were using more w=ter than it can make

The solar energy is go=ng down fast because Chris have to run the water maker at night to keep up=with the irrigation and the reason the generator went down was also due to=us trying to make water at night for the next day

If we had a water truck of our own we could probably just run water =ack-and-forth in situations like this. We have a little water wagon that w= use to water plants on GSJ but it's still not enough
