Jeffrey,

KA Wifi system price is approx $650k, if we need to install the KA tail moun=ed Radome additional $150k, price estimate $800k total,.

Gulfstream and Honeywell are in a disputed over the KA Tail mounted radome o= G550,. Gulfstream contracted Honeywell to build a KA antenna to fit under t=e Current G550 factory Tail Radome, appears the antenna Honeywell manufactu=ed does not fit inside the current radome, Gulfsteam was forced to fabricat= a slightly larger radome and get certified to accommodate the KA antenna,.=***Don Milum our KA sales person believes the KA antenna may fit under our r=dome, since we only have the Sift Broad band system mounted under our radom=, G550 radome space for a total of 3 different antennas that can be mounted=in the G550 tail Radome, such as (Satilite TV, Wifi antenna, and SAT/Phone a=tenna. We are only using 1 space under our radome, for SwiftBroad band Wifi= Don feels its worth a try to see if he can fit the antenna under our curre=t radome.

Don would like to send his team to Islip to physically try to mount the ante=na under our radome, as a trial. The New KA radome is expecting to be certi=ied by Sept 2017, price estimate for this radome is $150k

Plan A, if KA antenna fits under our current radome, Install as planned.

Plan B, if the KA Antenna doesn't fit under our current Radome, we could ins=all the system, except for the Antenna, operate with CB pulled, then instal= the KA antenna when the New KA band radome delivers in Sept 2017.,

Plan C, wait for KA antenna delivery and install at later date.

Do you approve of trying to see if the KA antenna fits under our current Rad=me?

Thx,
Larry
