Evening

Shower head - I believe the issue will be that we had to change out=the heating coils in the water heaters today, basically you had no hot wat=r, water heaters had to be drained. I ran all faucets and the shower heads=after new coils where installed but clearly that was not enough so will re=ove and flush out shower heads tomorrow

AC - found that battery required replacing this =fternoon, changed out but obviously did not get cool enough in time, sorry=about that

Regards=C2◆
