Hi Lesley,

Just a quick question regarding GSJ, do you or Jeffrey know whether when there is an hurricane how protected the main beach is? I saw on maps there is two corals reef that might break well and protect the beach, but I was wondering whether you already saw that situation? That will help me roughly to think about a resistant green bushes barrier that resist to sea water and get an idea of how far the sea could get into land...

Thank you.

Kevin.
