Attached is the site plan that incorporates=the new topographic information. It also shows a slight revision in the ba=hroom on the south side based upon our recent discussions. The bathroom wi=l be at the same level as the pool deck and we have pushed it back to redu=e the height of the base wall. The tallest wall we have now is 14 feet. We=have moved the entire building further west to accomplish this. Our design=approach is to have the building sit on an elevated platform similar to a =emple. The existing sculpture on the eastern end will be incorporated into=the platform as well as two other potential sculpture sites lining up with=the palms. We have also looked at the possibility incorporating some large=urns at those locations in lieu of sculptures. On the western side, we hav= developed two planting areas with palms and shrubs to screen the pool vis=bly from the main part of the house. This will require us having to remove=the existing stone seat. The eastern side will include a 12 feet wide terr=ce facing St. John. I feel we now have a solution that successfully merges=the formality of the existing courtyard and pool area within the confines =f the existing topography.
