Subject: That quanta are mental and therefore travel outside of spacetime faster than light

faster than light

That quanta are mental and therefore travel outside of spacetime faster than light

Einstein's, which only  
perspective.

of="entanglement."

monism like  
of a whole,

While still a monism, Leibniz's universe is dual aspect, more complex than Einstein's, which only features a spacetime aspect. Leibniz's universe also features a mental aspect or perspective.

Quanta, which are mental particles, can therefore travel faster than light, i.e. at infinite speed, enabling the Einstein-Podolsky-Rosen phenomenon

Bohm's Implicate-Explicate universe is seemingly dual aspect, but is not a true Leibniz's universe, since the mental and physical are simply Cartesian, two parts not truly dual aspect.

--

-Ever since the gratuitously skeptical Hume, science has imprisoned us in the dark cave of materialism and blind empiricism and needs to restore us to the rational, deductive sunlight of Plato (Bohm-Plotinus) in which the universe must be mentally governed, and governed from a singularity top down. -- see my website <https://independent.academia.edu/RogerClough> or search in Google with a search term such as Clough plotinus Site: <https://independent.academia.edu/RogerClough> This paper can be referenced by opening it in academia.edu <<http://academia.edu>> and copying the address in the address bar.
