The E Mail from Patrick, in broad strokes explains the recommendation to go with this pump.

The plan is to get Patrick to LSJ Mid March, to do critical membrane service, training and then back again to do pump install.

LSJ personal will be required to assist.

We need to do a Membrane service to relieve the high pressure situation on the existing HP Pump and also calibration of the post water treatment systems.

The order of Protec parts are critical if you wish to still make water, and hopefully extend the life to the existing HP Pump

One other issue that needs to be addressed is the Control Panel that was Saturated with Sea Water in 2014. =A0 Patrick will review this whilst on sight, and forward recommendations.

Can we proceed with purchasing?
