units with the below model  
Kenteico CP216 Duplex Softener

Control handles on the Fleck model where prone to failure

2. Someone will need to check with DPNR regarding discharge of Brine, could be a permitting issue  
Or install some where they won't see system during site visits

3 Danny will need to install variable speed drives on the main distribution pumps otherwise the  
continued water hammering that is occurring will dramatically shorten Softener controls

4. Why hasn't Danny switched Master bedroom and main compound over to cistern water  
You had this system and cistern refurbished for back up just in case this type of event happened.  
All the cisterns were cleaned out prior to my departure 2013  
Regards  
Brice
