Hi Jeffrey

As today 20 Feb 2017 we have finished the preliminar= Master Planning package, which was already sent to you on the 17 of February 2017 =or review and comment.

We have being following the path similar to when we =ork with resort developers, since this is a unique project with many areas that need development and work. As you can see, we take the beginnings of each zone, work through them roughly, ge= approval and then polish each are with renderings and refinements.

There are many different ways we could have taken, b=t this was the effort we undertook to begin communication.

The final power point package dated 17 February 2017 represents all selected drawings, plus some colored perspective of the blac= and white vignettes and we also we divided the Island into seven new zones =hat have been identified and established thanks to this effort.

As a note : there can be other sub zones but like I =aid, these are the 7 main zones identified for this current package.

If the seven main Conceptual Architecture zones of t=e Master planning effort get approved, they will then have to be further developed w=th Architectural Conceptual drawings. Similar to what we did for the Zone 3 or what is known=as the House zone.

Please let us know if you wish to continue. If you do we will put a proposal together and continue to develop all of the zones.

Jeffrey, it was a pleasure meeting you at your place in New York and visiting your Island. We hope that we have added some value or helped to identify some areas and flow for the island or at least sparked some ideas for you in the last 4 weeks.

All the best
