<http://blockgeeks.com/guides/what-is-blockchain-technology/> <<http://blockgeeks.com/guides/what-is-blockchain-technology/>> =A0 i will try to go down two paths . 1 to explain blockchain tech to you, i will follow by sending articles more in depth. please feel free to call with questions. 2 then the question of sovereign involvement could and would be very exciting. In order to be designated a currency a digital blockchain version would need sovereign guarantee.=C2 It would be revolutionary for your part of the world to innovate in the financial sector. combined with a sharia compliant new currency. =A0 . with block chain , your contract execution is inherent to the code of the transaction so in keeping with sharia law , the contract would self execute making any unilateral change impossible.
