Rich,

I spoke with =arluz earlier today and I understand that Mr. Epstein is coming in =arlier than expected.

The crew with an extra man was scheduled to work =omorrow, Friday and Saturday and of course all next week

based on the recent time schedule.

We have worked very hard to work around the rain and rescheduling other work in order to plan this time before

Mr. Epstein arrived May 26.

If Mr. Epstein arrives earlier than planned we could always stop working and return after he leaves. This might even give him the advantage to see the work in progress if there are any adjustments he may wish to make. In almost every job we do since they are custom, customer input is typically positive during the process. It likely would not effect any cost, just design elements.

Let me know your thoughts.

At present time material is there and workers are scheduled Friday and Saturday as well as all next week.

Jim
