**Subject:** got a grant for Bahamas conference, you are invited

Dear Jeffrey,  
we are organizing our second conference in Long Island Bahamas, see

<https://cgc.physics.miami.edu/2017ApplicationForm.html>

you are invited of course. Applied and got a grant for this Bahamas conference, see

<http://fqxi.org/grants/mini/winners>

the entry

Eduardo Guendelman Ben Gurion University \$6,000 Bahamas Conference on Gravity, Particles and Cosmology

it may be the beginning of something.

New Scientist, and Discover <<http://discovermagazine.com/>> . A freelance journalist and author, she has published two textbooks in collaboration with National Geographic <<http://www.nationalgeographic.com/>> and is now working on her first popular physics book (which in fact will cover some of my work on "baby universes" ). Her documentary, Aperture Fever, about amateur astronomy, was broadcast on The History Channel, UK, in 2008. She has also worked on the forthcoming Nova television series "The Fabric of the Cosmos". Merali received a first-class degree and Master's in natural sciences from the University of Cambridge <<http://www.cam.ac.uk/>> and a PhD in cosmology from Brown University <<http://www.brown.edu/>> .

that is all for now,

all the best,

Eduardo

Subject: POSSIBILITY OF DISCUSSING FURTHER DETAILS

To : Jeffrey Epstein,  
President of the Jeffrey Epstein Foundation,

Dear Jeffrey,

I was very happy to hear that you are interested in the project concerning starting a Theoretical Physics Center in Long Island, in the Bahamas. So far there has been great interest from the University of Miami, they suggested that such center could be an extension of their theoretical physics group. There has been interest also from physicists from Havana and from Puerto Rico. There have been positive comments also from Fernando Quevedo, the head of the ICTP, the International Center for Theoretical Physics, an Italy and UN funded organization, based in Trieste Italy who suggested there could be a possibility the ICTP could have some involvement (may be to fund participation from Cuban

physicists?). Also Richard Keywor=h, a developer in Long Island h=s mentioned that he was willing to sell the land needed for the center at a discount and=also help, using his connections, to get some (but probably no= enough) funding from the Bahamian goverment.

We would like to know to what extent you would like to participate in =his development, of course we can take your suggestions concerning the favorite topics you would like to emphasize= for example gravity?, I understand this is one of your favorite topics, since you once organized a conference on =his topic.

I am planning to travel to both Miami and Long Island in March, I coul= also visit you for example in the Virgin Islands, but other places could be as well, to discuss the extent of your=participation, your input on what subjects you would like to be emphasized, what are your suggestions f=r the name of the <=pan style="font-size:10pt">center, etc., anything you want, =/div> All the best,

Eduardo Guendelman,

Physics,

Ben Gurion University, Beer Sheva, Isra=l.
