Subject: Katinka's "Spider=" in "Plant: Exploring the Botanical World" (Phaidon)

"Matson is the first a=tist to have taken scanning into the realm of high art." (Phaidon E=itors, in "Plant")

I want to se=d you a copy of the gorgeous new Phaidon book, "Plant: Exploring the Botani=al World" <http://bit.l=/2arZcTe> , a "curated selection of 300 of the most beautif=l and pioneering botanical images ever", including botanical works f=om cave-dwellers 9500 years ago to the murals of ancient Greece, to Linnaeus, da Vinci, Pierre-Joseph Redoute, Darwin, Emily Dickinson, van Gogh, O♦=99Keeffe, Ellsworth Kelly, Mapplethorpe, and...Katinka Matson.

In addition to incl=u=ion of Katinka's iconic image "Spiders♦=9D <http://images.katinkamatson.c=m/images/Spiders2013.jpg> in the volume, she is featured by Phaidon in the first serial a=ticle in major publications such as The Guardian <http://bit.ly/2el8VIJ> , and LIFO <http://bit=ly/2dQVMZG> , the largest news site&nb=p;in Greece, which selected "Spiders" as the lede image (vi=wed on a desktop browser, below). And take a look at her recent work on her=new website: katinkamatson.com <http://katinkamatson.com/> .

<=div>
Where shall I send the book?

Best,

JB
