Out of 13 states we =ot 11 right. The ones we got wrong are NY and WI.

In th= last report, analyzed data was of 3 days in which Clinton got a positive =pike after she got clearance from FBI. However Trump dominated the social =edia positively if we analyze one week data before starting time of electi=n, monthly data and entire data which we have gathered for months. Based o= this we predicted on our Facebook page on 30th October that Trump will be=next president of US.

Our model works but I think=the important question which we failed to answer is that how much historic=data must be analyzed to make the right decision. This could have been ans=ered if we had a Data Scientist. Also I believe its a great tool to track =oters and get them to vote. It can be used in French elections next year o= elections of Brazil in 2018 but unfortunately I have to shut down this pr=ject as getting data from Twitter is expensive and the start up is running=out of money.

I am going to focus on cyber securi=y again and will definitely reach out if I have a powerful investable idea=
