Dear Yau:

Greetings from India.

Here is the proposal whic= is ambitious and vast in scope, I call it "Periodic Table of Life" or "Goo=le Map of Life". This will use a number of investigators including Li=e Scientists, Computational Biologists, Mathematicians and clinicians to bu=ld. This could be compared to the "Human genome project" which is hel=ing us in understanding the genetic basis for human disease.

Please let me know whether the donor would like us to buil= on it.

Best,

Vijay
