Good evening =effrey,

</=:p>

Please =eview the attached four (4) page pdf document.

</=:p>

Kindly pay =pecial attention to page 4 (Equipment Block =iagram).

</=:p>

I have =spoken with Larry a couple times today and I believe the only real =uestion at this point is whether or not you will ever want to watch a =VD or other means of video on the front =onitor?

</=:p>

The way I =ave illustrated it is such that if you ever decided that you wanted to =atch a DVD / Apple TV (photo's, video, etc) on the fwd monitor, =ou would simply press the video splitter switch in the credenza and =hen change the input on the TV with the remote =ontrol.

</=:p>

If you will =nly be using the fwd monitor for the cockpit camera and the airshow =nly, then we do not need the video switcher and you will not need to =se the remote to change the inputs on the TV.

</=:p>

I thought =his block diagram visual would be a good way to make sure that we are =ll on the same page.

</=:p>

Please =rovide some feedback. I will be leaving for vacation on Thursday =orning and I would like to provide my guys with a solid direction to =eep us moving forward.

</=:p>

Thank =ou.

</=:p>

</=:p>

</=:p>

</=:p>

</=:p>

</=:p>

</=:p>
