</=:p>

Jeffrey-=/o:p>

</=:p>

The photo of =he back seat on the Rolls Royce has a detail that "pulls =own" the upholstery on the back seat.

</=:p>

This detail =ould look incredible on your seat (see both =tachments).

</=:p>

It is only a =/4" x 8 1/2" that would be part of the "pull =own" detail in the upholstery on the back =ests.

</=:p>

We would =ave them machined from aluminum and have them metal plated. We would =hen wrap the center section (7") in the white =eather.

</=:p>

Should we go =head with this? Need to know ASAP so we can have our guy fabricate =hem.

</=:p>

</=:p>

</=:p>
