Mr. Epstein;

I apologize that the incorrect plants were removed. It was my understanding during our discussion that you wanted the scrub and brush taken out. The project has been halted immediately.

I have spoken with Chris and he had the same understanding. I apologize that we misunderstood. He is planning to be back on site on April 7th. I will forward photos to him and we can start to work up a plan to move forward with some ground cover.

I have included some photos of the unfinished area to show the type of brush that was removed. Daphne is looking through her photos to see if we have anything for a before-after comparison.

Again, please accept my apologies. We will focus on other projects until we get Chris on site and additional directives from you.
