Subject: Transforming superyacht financial management

First accounting software built specifically for superyacht Captains, Owners and Management Companies.

It connects users onboard and in the office via secure synchronization with an onshore server while allowing to work fully offline. As of today more than 100 yachts ranging from 20 to 140+ meters have chosen Latitude365 for its simplicity, robust multi-currency reporting and expense approvals system.

Unlike Quicken or any other accounting package, Latitude365 allows captains, heads of departments and office managers to work together and manage expenses as a team. That ability to seamlessly share information and track budgets in real time allows for true financial management, not just accounting at the end of the month."
