When you ha=e a chance, could you please run the following command in Terminal ( /Appl=cations/Utilities/Terminal.app ):

ls -al ~

and send me the results?

This will list the permissions on each of the folders inside Story. Once=I know this, I can send you a followup command to fix them.

=/div>

Thanks (and sorry about this hassle),

The downloads are failing because the permissions=are screwed up on the folders within your home folder. I'll be hap=y to walk you through the fix, but the steps are outside of normal compute= operations, so I'm sending you the instructions — there a=e screenshots of most of these windows at <http://pondini.org/OSX/Password.html> .  
[<http://pondini.org/OSX/Password.html>](http://pondini.org/OSX/Password.html) .

I'll be available on my cell a= [REDACTED] <tel:[REDACTED]>

To fix it, we need to reset your=home folder permissions. To do that, you'll need to restart the computer into th= recovery partition, unlock the disk and use the resetpassword utility:

Step 1: Restart in Recovery Partition:

1. Restart the computer and =A0right before it chimes hold down the Command + R =A0keys until the while menu comes up.

Step 2: Unlock the disk (since FileVault is enabled, we can=E2 t modify any settings until the drive is decrypted:

2. Click Disk Utility
3. Select the Macintosh HD partition and choose File > Unlock
4. Enter your computer password ("as =80 ")
5. Quit Disk Utility

Step 3: Reset home folder permissions with the resetpassword utility

6. Click Utilities > Terminal
7. Type =he following command: resetpassword (all lowercase, no spaces) and enter
8. Select the Macintosh H=, choose your account ("Story")
9. Click Reset at the very bottom =f the window. (Do not reset the password)

Once it finishes, you can quit out and restart and everyt=ing should function normally.

Thanks!
