Steve asked me to send this to you as well to review with JE.

Hope you are having a good day.

Best,

---

Richard,

Hope this email finds you well. I am at a=complete stand still until the two proposals that were sent to you and that=we discussed on the phone on Nov 5th are signed and returned to me. I=have done 100% of work that can be done on my end until these get signed an= we can start to schedule work and move forward. I have sent several e=ails stating just this with no response, please see attached. We are l=sing time as it has been a month and there still is no progress. In o=der to get the revised purchase order for the furniture and for us to move f=ward the proposal from PMG that I sent over needs to be signed a=d the deposit check will need to be sent, this is only \$8,500 and ther= are

terms to this proposal. They sent over the first pass of the furniture on good faith and there are revisions that need to be made to that package on the PMG side as I have provided them with all the revised specification already. For us to move forward we need to have final numbers and start ordering ASAP and this requires a signed contract. I hope that this is clear, if not please let me know as I feel like a broken record. Please let me know where we are with this portion so that we can move forward to meet our time lines.

Thank you,

[REDACTED]
