Dear Mr. Epstein,

I am hoping you will make time, in spite of your busy schedule, to personally meet with me.

As we are almost neighbors I am available to you at your convenience, to discuss some projects that might not only be fun but important.

Current I own and operate seasonally the TurnAround Spa Lodge and use that as a platform to experiment and invent and create. In the past I've been a science teacher for a few years in NYC, taxi driver/private chauffeur, upscale florist supplier, major domo, salesman, storeowner, even 'acted' my way into a movie; in other words I've

explored some of my gifts. Now it's time to go to the next level. As it is my understanding you are quite successfully involved with some high end money, finance and science project your excellent position may help bring some of my concepts to the next level.

As I am now mature and still single, I have time to pursue those projects that interest me , and feel with all my explored experience, I can with your assist develop and make happen some of the larger and more important visions and solutions. With my past experience there are few problems to which I cannot legitimately offer possible solutions or alternative approaches.

So based on the above, I hope to capture your interest.

In hopes of mutual benefit and a pleasant hello, I am extending Best wishes through the New Year,

Richard Barr
