Jeffrey

as discussed during your last visit we would like to recommend the replacement of Bobcat with a newer unit. The bobcat is used for roads, snow removal, cleaning out corals, post hole digging, loading and unloading small equipment, cactus and dead pinion removal, tree planting etc

Existing unit has 2645 hrs, we have been offered 8k cash from a local contractor, Bobcat of ABQ offered \$5500.00 as a trade-in.

We already have most of the attachments, except for a blade which would be useful for road work, arena, stables and snow removal.

Attached estimates for a

New Bobcat @ \$44,047.79 includes taxes, ABQ local dealer Used, 2011, 19 hrs @ \$35,500.00 Taxes and shipping not included 72" blade Attachment: est \$2200.00

I did contact, CO, AZ, TX and UT dealers, I want more for both used and new machines

Can we move forward with finalizing a deal on a good used machine for your approval

regards Brice
