Subject: Potential sixth bay in the Engineering shed - August 3, 2012
Attachments: Old cistern.jpg

Greetings Mr. Epstein,

Danny has a proposal for your review:

The old cistern in the Engineering shed has been drained. It is approximately 20 feet by 14 feet. If a door opening is created in the outer wall, these could become a sixth storage bay. Danny estimates it would be a 12 day project: 2 days to create the door opening in the outer wall, frame and install the door (the door is already made), 2 days to wire for electricity, and 8 days to build and install shelving, epoxy the floor and paint.

This project will have to be separate from the original 5 bays project, since that project must be completed by 8/14.
Respectfully submitted,

Daphne and Danny
