Jeffrey,

Here are some images for the design of the shade structures for your pool near the Flag Pole.

The first two are ones you sent us for inspiration.=/o:p>

The next two shows what this would look like next to your pool. Proportions and size still need to be worked out.<=span>

The rest of them are images we pulled to solicit more input from you;

- 1) Do you want these to be open trellises and/or solid panels?
- 2) The images you sent us show wood trellises, do you prefer wood?
- 3) Examples show canvas cover, metal covers, retractable covers, any preferences?
- 4) Do you prefer a flat cover or a pitched cover?
- 5) We found trellises constructed out of vinyl, may not be as authentic looking but perhaps durable in this climate.
- 6) The model shows three separate pergolas on either side, would you want more or less? Size?
- 7) Do you want the columns to go into the water? Just as the first two images.

We may not have enough width for this detail with only 21'.

Let us know your thoughts so we can proceed with the design of these trellises.

We welcome any images you may have.

Thanks,

Tom
