=DIV>Attached (2)

=DIV>

=DIV> The flagpole pool survey showing the field dimensions of the mock up Jeffrey laid out. I believe the critical issue is the east west alignment , so everything is measured off that enterline

=DIV>

=DIV> The stair layout is laid out per your sketch showing odd threads and it works from the kitchen deck to the top of the master landing as shown .We plan to pour the stairs to the master landing edge so we get access for Jeffrey by 2/1, but the landing and balance of stairs are yet to be worked out.
