Subject: Revised Banquettes and Cabinets

Gary,

Attached please find a drawing for the Banquettes per your last instructions. I have shown elevations of every view. The cabinet that butts to existing kitchen cabinets will have a small "L" offset in the corner. This is so drawer pulls will bypass each other. I have 1/2" clearance for that to bypass. Also I am going to the floor with the cabinets and not using any toekick. The cabinets are so shallow, I don't want to cut away their stability. Also, since the last drawing, these cabinets are 1" shallower.

I do not have pricing for all that needs to be done, but it's probably in the \$15,000 range. I can firm those numbers up once we know what we are going to do.

I am assuming that each piece of Banquette and Cabinet will have to have crates built for shipping to Florida. That is the only method of shipping that I can imagine, because what we have probably would not justify having a shipping container sent to Oklahoma?

Let me know how to proceed, and I'll get final drawings and pricing.

Best Regards,
Kirk
