Jeffrey,

Here are sections and elevations for the living room and=pool room for your review;

East/West Section A:

The Living Room north elevation basically mimics =he Zorro Ranch Living room.

The large central window has the exact same proportions =s Zorro Ranch.

Ceiling height to underside of beam is 18', to und=rside of ceiling is 20'.

Doors could be solid or glass, panel design is sim=lar to existing doors of original buildings.

Pool elevation is similar to the Ritz in Paris= ( From Photos )

Columns are 2'x2', ceiling height to undersi=e of beam is 16', underside of ceiling is 18'.

Large 10'x26' mural at the center with doubl= doors on either side with Oval openings above.

HVAC ducts are placed below the beams.=/p>

Lighting fixtures are placed on side of columns similar =o the Ritz.

East/West Section B:

Spacing of beams are at 15' on center with three b=ys. Option A has 5 bays at 9' on center.

Central window is slightly smaller but better proportion=d to this Living room.

There are no oval shaped openings here.

Pool elevation similar but with three 9'x12'=murals at the center.

HVAC ducts are placed to the sides of the beams allowing=18' to underside of beams.

20'-6" to underside of ceiling.</=pan>

North/South Section A:

West elevation shows two sets of doors; solid or glass.<=:p>

East elevation will be the same.

We need to determine the east and west elevations;<=o:p>

Perhaps windows on the west side and mural on the east s=de.

Let us know if you have any comments or we can call you.=o:p>

Thanks,

Tom
