Jeffrey, I thought this went out yesterday, but it was still in my outbox.

Attached is the modified plan for the Main Residence. We are working on the Sketchup model, and should be able to send you some new images Monday, with the living room moved.

- \* We shifted the Living Room south, so that its north wall aligns with the north wall of the screening room.
- \* We raised the Living Room, so that its height (spring line) aligns with the height of the main residence. The floor is at about +47'.
- \* We added the two alcoves on the south side, intended to be a pool-level bathroom/changing room, and a mechanical room.
- \* We started to show a stronger connection to the Library.

Tom will have a sketch for the terrace from the pool to the living room on Monday.

We are emailing the revised flagpole pool plan to Gary today, and will send the rest Monday.

Thanks,

Warwick

Subject: Latest Plan H-1

Warwick,

The Living Room is now aligned with the Screening Room.

It is at Level +47' so that eliminates most of the terraces and stairs to the east.

I am trying a stepped terrace approach off the road leading to his Library.

Not sure about materials yet but perhaps if we can model it.

we can come up with more details..

I am off to Glendale all morning and back mid afternoon Thursday.

Tom
