Hi Lesley and =ich,

See attached invoice. I put this together based =n my brief conversation with Jeffrey on =at.

The only payment that should go out ASAP =s the exome sequencing work. That comes out to \$1000 for the saliva =ample I collected on Sat from him PLUS \$1000 for exome sequencing of =is fibroblasts PLUS \$1000 for each person he wants to add to the study =if any).

The whole genome sequencing through Illumina does =ot need to be paid until he gets the second consent form from me - =bout 2-3 weeks from now. But if he wants to send and just have me hold =n to it, that's fine. This cost is \$11,400 for rapid turnaround. If he =anted to include his parents for "trio analyses" that would be =21,000.

All the other stuff is optional and explained in the =ttached invoice. Happy to discuss with him if there are any questions =specifically the large bioinformatics item / =7).

I think if the check is in the \$5000-6000 range just for the exomes, it =an just get made out to me and sent to my home =ddress.

For larger checks including those =ther items, I wonder if it could be mailed to one of my family members. =his is embarrassing but since I'm divorced and owe the ex some money, I =on't want a large amount going into my personal account and potentially =eing at risk when it all needs to get used for this research. Anyway, =et me know what Jeffrey is willing to cover and if the check is large, = may ask that it go to my dad (who is absolutely trustworthy - he would =ust be hanging on to funds as we disburse it for the various research =tems).

Thank you both of your help. Let me know if anything needs clarification.
