Subject: Dock Location
Attachments: Potential Dock location.pdf

Cou=d you live with a dock at the location in the attached picture. We c=n make this work there is one large ESA listed coral but we can work and a=oid it. There are other corals but we can work with those. ⚡=A0 The area has rock and it will impact construction methods but there is =lenty of water depth and plenty of room to work with. I saw there is=a new road (path) cut to this area so I know its accessible.
