From: Mat

From what I could tell last week= it looks like the solos batteries are currently running at 85%. Not t=o bad after 3+ years. It would be good to bring a tech in for a syste= audit. They also have the ability to hook this up to the Internet so=that someone from your team can remotely monitor the system or receive aler=s if needed.

We can also call Peter Rosen from "ProSol=r System" [REDACTED] on St. Thomas or someone from Solar systems can co=e out.

I'll get more info...
