Subject: To Prof Neuman Re: Final Exam, Student Roster, UCLA Interdisciplinary Initiative

Greetings, Dan -

1. FYI - please find attached this week's Final Examination for Music Mind & Brain plus the Class Roster organized by the students' Schools and Depts - quite a nice mix of music and science students...

2. Looking forward to meeting this Wed at 11a - please let me know if you would like the President of the Undergraduate Cognitive Science Society to join us or not (he knows many of the faculty in Letters & Sciences and the Medical School who are working on music neuroscience, psychology, and education).

3. Did an interview with Roger Bingham of The Science Network a couple of weeks ago at UCSD (he has an appt in Terry Sejnowski's Institute for Neural Computation there, where colleague/MusInd 103 guest professor John Iversen PhD is working on neural correlates of rhythm perception) - here's a link to a previous lecture TSN filmed at the NY Academy of Sciences:

<http://thesciencenetwork.org/programs/music-science-medicine-at-the-new-york-academy-of-sciences/functional-brain-organization-in-relation-to-music-cognition-emotion>

Cheers,  
Mark
