Subject: New ontology data base for the Centre for =ioinspiration

Roger,

I was quite impressed =ith our conversation this week about your pioneering work to access the =nowledge of "experts" such as our zoologists, botanists and keepers, =nd to connect our challenge of linking natures' adaptations to =ndustrial challenges.

As requested, we have =repared a brief on the profound need to develop a tool for the linkage, =hich in my opinion can change everything. The Centre for =ioinspiration, at the world leading San Diego Zoo, is dedicated to =reating this breakthrough database and advancement. Your interest =n our effort is greatly appreciated and I look forward to ongoing =onversations about this project. As you indicated this brief may =e help you to talk with funding sources for us to collaborate on the =reation of this important =nbsp;advancement.

Please call me anytime if I =an help you with anything at =nytime.

Partnering with nature for a better =orld,

Larry
