Jeffrey

Attached estimate is for the repowering of Little C for your review \$50,416.00, plus \$10,000 for tidy up work on c-bin house, hull and trailer.

as discussed the 300 yamaha outboards are lighter than existing 250 and would be more suitable for a boat of this size and weight, 15,000 lbs with out passengers this would also be a more fuel efficient option as we would not be running the boat so hard.

Estimated trade in on old engines, \$8000.00 each

Regarding Fat= estimated refurbishment cost could reach around 120k plus this would be new engines, steering, electrical hull work, paint etc</=iv>

For any large loads of cargo or crew we can use bare or just do two trips multiple people can drive little C vs Fat=C Hurricane haulout is local either LSJ or St Thomas, not BVI

please advise on how you wish to proceed.
