..we were pretty close =lose to golden ratio with the sizes of the rockswe draw... the difference =as like half to one inch. the longer rock is aprox, 32 inches and the sh=rter is aprox 19.75 inches.., the golden ratio would be 19.87 . =3B in the first picture is what we paint sunday and in the second =icture i did the measurements..

the rock are not fin=shed yet, i have to put a little of the off white we used..
&=nbsp; i divided the high of the building to draw the rocks. the top and t=e bottom has the longer rock.
i draw also some rocks o= the door side of the building too(the last picture).., this door maybe =e should make it rectangular, i dont think we have enough space on top t= make the arch..
today was rainy and very wind=, it was a little difficult to paint..
i will send tomorrow =ther pictures. i'll keep in mind the golden ratio for other measurements..=2Cdoor, etc

thank you,

=3B ion
