After many =ours of hunting down leads, the air gasper for the Gulfstream G650 is =anufactured by Birk Aerosystems in Garden Grove, =alifornia.

</=:p>

I spoke to =onnie Birk (partners in the business with her husband) and she informed =e that the gasper they produce for the G650 is proprietary to =ulfstream only. Further, it would not work in any other =ulfstream but the 650 as the air duct system in the 650 is a unique =esign and has certain flow features built right into the =uct.

</=:p>

We spoke a =it and she said that what we need is "poppet style" =asper to handle the flow (same as the one I showed in a prior =-mail).
