Hi Tyler,

Below are my ed=ts to the NET site: I sent them last week but they weren't incor=orated yet.

*

Homepage: the flashing titles=over the photo should be: 'AI Projects', 'AI Press', and 'AI Blog' and the= should link to those pages accordingly. Right now they link to non-AI pre=s releases.

*

Homepage: use the attached AI photo vs. the=photo of NY City.

*

Navigation: at the bottom of the site= should have all of the menus, not just 'About' and 'AI Projects'

*

'AI Projects' should have its own menu at the top=right of the page after 'About'. Right now its a sub menu in the About.

*

Jeffrey's full name should be in the url of the 'About' page.

*

the Twitter link does not go to Jeffrey's=twitter account page: @Jeffrey_Epstein

*

the R=S link at the bottom of the page should link to the Blog page.

<=i>

About page: change Jeffrey's photo to the one attached.

<=i>

Blog page: should have the updated RSS feed-- right now it only sho=s a post from May.

*

Contact page: the address should say= Jeffrey Epstein VI Foundation. The VI was left out.
were all the meta tags etc put in?

thanks,
