Hi Carlos

Good speaking to you this =fternoon.

From our discussions it sounds like a 10.0 or =1.3 meter Naiad would work extremely well for your employer's =seeds. I've attached a couple general arrangements of some law =nforcement boats that may work very well for him. Please note =hat we can do a custom cabin very easily and these are only a small =ampling of our design inventory. The law enforcement style cabin =llows for full walk-around at one level.

All the boats are available with either =ull-circle inflatable tubes or D-shaped tubes in either inflatables or =oam core. Our foam core is soft and externally looks just like a =HIB. It is not hard and unforgiving like a SafeBoat =ollar.

I've sent some photos of several other vessels =or you to look at as well.

Once we narrow down a size and basic layout, we'll=create a new GA specifically for your employer's =roject.

Thanks

Steve

Steve,

I just spoke with =arlos. I believe they called last year about a custom yacht tender for =heir private island, Little Saint James.

They are looking =or a tender that is similar to their current tender (see attached =photos). Sounds like they have their eye on the Oracle 10 meter but with = slightly different layout.

I told Carlos you =ould get back to him to discuss options and pricing. His number is [REDACTED]

Jen
