Hi Steven,

We just launched our redesigned [dev center](#):

I know that it was long in coming to create a more attractive site and include a more sequential getting started guide. Let me know what you think. And I'm not just looking for approval 😊.

Also check out our new video series. Trying to be a bit more contemporary than the channel 9 talking heads.

[Sensors overview](#)

[Mapping your location](#)

[Updating a live tile from a background task](#)

In general things are a little rough around here. Lots of activity on the BG side seemingly motivated by panic, tone getting a little less collegial, just overall harder to get things done. We're really missing you around here. I'm curious about what will happen in the next few weeks organizationally. People are very, very nervous.

I personally feel challenged just running this team and keeping folks motivated. The team has really changed over the last few years, but it's time now to settle them down and let them get better at what they've learned. I think I know better how to drive change than how to keep 180

CPub folks happy and engaged. Will do what I can!

Hope you are having the time of your life at Harvard. What an opportunity for those students.
And what a blast!

Best regards,

Ulrike
