Hi Richard,

The Krell amp will cost over \$500 to repair and having to repair the second one will bring the cost to well over \$1000. We'll be putting together a proposal to revamp the entire gym system, I should have that for you tomorrow.

We are no longer Integra dealers for the sole reason that their products as of late have been very unreliable, this is evident with the media room's receiver breaking down after 1 year. We are recommending the Marantz AV7701 preamp processing receiver, a touch over \$1700.00 and a very powerful unit. It is fully compatible with the new JVC 4K projector since the receiver has 4K upscaling and 3D pass-through which will further improve the images displayed and it has Airplay. I should have some remotes for Jeffrey to look at by the end of the week and will coordinate with Lesley as to when I can present them to him for approval.

Best

Jeff
