Jeffrey

one of the Jet Ski is down  
Carlos took it to Off Shore Marine to inspect after it kept alarming on an over heat  
report from them was water in cylinders, expect possible blown head gasket  
expected cost of repair approx \$11,000 ( new engine required )  
please note this unit has sustained hull damaged as well.  
MSRP on new unit approx 15,000, Emad should be able to get it lower  
would suggest replacement of both units  
please advise
