Fellas,

Due to the in process closure of MCC I was instructed to destroy all evidence that is not needed for investigations. I am keeping all Epstein stuff and the three weapons in the case that is being looked into by AUSA [REDACTED]. What do you guys need me to keep that you do not have already? If anything, please let me know. I do not have anything except this new case I am working on with [REDACTED] in my approved referral folder, so I am thinking you guys have everything you need. If not, let me know and I will set it aside.
