

# TEMPERATURE SCREENING IN PROGRESS FOR VISITORS

## PURPOSE

The FBI uses this screening process to help ensure the safety of the FBI workspace and to help prevent the spread of COVID-19.

*While waiting to be screened, please observe proper physical distancing and stay at least 6 feet from the person in front of you.*

## BEFORE YOUR TEMPERATURE IS TAKEN

To be screened, you must be wearing a cloth face covering and must be able to answer "no" to both of these questions:

1. Do I currently have a fever, cough, shortness of breath or difficulty breathing, repeated shaking from chills, muscle pain, sore throat, new loss of taste or smell, or any other flu-like symptoms?
2. In the past 14 days, have I been in close (less than 6 feet) and prolonged (more than 15 minutes) contact with someone with presumptive or confirmed COVID-19 without wearing a face covering or mask?

If you answer "yes" to either question, you must not approach the screening area. You are encouraged to contact your FBI POC.

## TEMPERATURE SCREENING

By approaching the screening area, you consent to have your temperature taken. Verbal consent is not required. The screener will use a no-touch, infrared thermometer placed about one inch from your forehead. The temperature reading is not recorded.

If your temperature is below 100.4°F (38°C), you can enter the facility. If your temperature is at or above 100.4°F (38°C), you will be denied entry and asked to contact your FBI POC.

*We appreciate your cooperation with this screening.*

*Cloth face coverings are to be worn in FBI facilities in common areas, including hallways, bathrooms, cafeterias, vending areas, and conference rooms.*
