All,  
In regards to Epstein here is a timeline and information as we have it.

OCME case #M19019432

Were all on scene at the Manhattan Correctional Center at 1200 hours and allowed into the facility.

Epstein was discovered unresponsive alone in his cell #220 9th floor L tier at approximately 0633 hours by BOP [REDACTED]. According to information obtained from BOP Special Investigator [REDACTED] and information that was related to [REDACTED] Epstein was found with a torn piece of issued BOP orange colored bedding around his neck with the other end affixed to the bunk bed. CPR was conducted by [REDACTED] and Supv [REDACTED] BOP nurse/medic [REDACTED] was alerted and responded. [REDACTED], who was interviewed by C19 personnel stated that Epstein was unresponsive and had no vitals at 0635. [REDACTED] attempted to shock Epstein with an AED but no shock was advised. Epstein was transported to the BOP medical room on the second floor with CPR still in progress and oxygen along with other narcotics administered with no response. 911 was called and records indicate Epstein was transported at 0644 hours to NY Presbyterian where he was later dead.

Office of the Inspector General has been made aware that a BOP guard falsified logs regarding to Epstein. Details of who or how this information was exactly obtained is still being gathered but preliminary information is that an officer made a confession to some authority. OIG has opened up a criminal case in regards and has asked all interviews or scheduling of interviews be suspended and coordinated with their offices. Upon receipt of the BOP complaint to OIG, the BOP complaint stated that 2 guards falsified the logs indicating that they conducted their mandatory rounds (which are to be conducted every 30 minutes) when in fact they did not. Upon further receipt and review of the complaint provided by to OIG C19 personnel will coordinate and investigate with OIG.
